

Enhanced Mussel Watch Phase 1: Eastern Great Lakes

Wednesday, September 23, 2009

-Kristina Lauenstein

The 23rd marked the beginning of the end of this year's Mussel Watch sampling in the Great Lakes. We unloaded the truck and gave Mike the benthos samples. With the contents of the truck and van strewn across the grass, Ed, Kristina and Gunnar said goodbye to Mike and spent the morning shipping packages. In the afternoon it was on to Poughkeepsie, NY near a National Estuarine Research Reserve and the Hudson River MW sites.
